

Overfill / Spill Prevention for Solvent Tanks

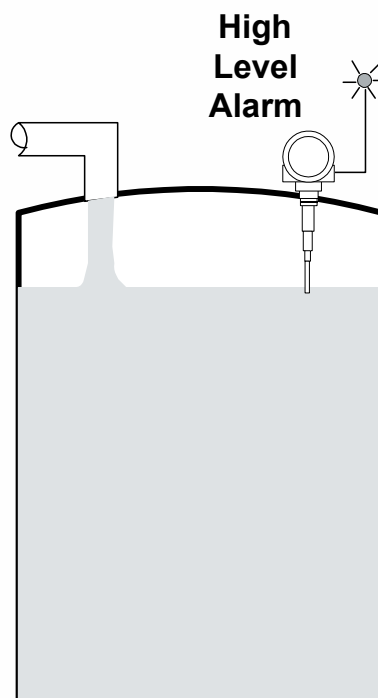

Don't Clean Up Spills ... Eliminate Them!

THE PROBLEM

- Overfilling solvent storage and day tanks will cost thousands of dollars in fines, clean up cost, loss of material, and down time.
- Solvent spills can cause injury and loss of life to plant personnel.
- Overfilling flammable material storage tanks can cause devastating fires.
- Continued incidents of overfill can cause an elevated level of attention between the facility and local authorities.

THE SOLUTION

- The Intellipoint™ RF Admittance High Level alarm from Drexelbrook® prevents overfilling.
- The Intellipoint automatically function checks itself three times a second insuring it will function properly in a real high level emergency.
- The Intellipoint calibrates itself. Simply apply power.
- The Intellipoint Mean Time To Failure (MTTF) has been calculated to more then 110 years*.

*Intellipoint loop powered model as tested by Exida.com

Other Solutions:

- | | | | |
|-------------|----------------------|-------------------|-------------------|
| • Mix Tanks | • Sump Level | • Low Level Alarm | • Waste |
| • Day Tanks | • Floor Drain Levels | • Acrylic Level | • Pump Protection |

Typical Uses:

- | | | |
|----------------------------|-----------------------|-------------------------|
| • Continuous Level Control | • Point Level Control | • Waste Management |
| • Inventory Management | • Overfill Protection | • Regulatory Compliance |
